

To whom it may concern

03 July 2015

This letter serves as verification and validation that the following student has completed a 2 week internship over the period of 26th June 2015 – 03rd July 2015 at Micros South Africa PTY Ltd, upon the student's request.

The student was inserted into the technical & development team, to assist with a project. The project was that of writing, building and integrating a script into one of our current products. The task and responsibilities assigned to the student were as follows.

Translation and interpretation of the initial script.

Once translated, to create a design for the project and implement the design.

Assign product ID's within the script and test.

Provide a written document how the software/script will be installed, integrated and run on a present product.

The student was exposed to the following software knowledge.

C++

C- Sharp (C#)

Microsoft Visual Studio 2013

In summary, the student worked well in the workplace, showing great initiative, professionalism and willingness to learn. Much research was needed to be carried out to complete the task assigned to the student.

This was successfully done. The student has a good understanding of writing and designing scripts/ software to integrate into existing products.
